

Date: 30 January 2024

Decision relating to the determination of Charges in relation to the
Airport of Thessaloniki "Makedonia"

Following the notification of the justified proposal for specific changes on the charges of the Airport of Thessaloniki "Makedonia" (SKG), as such were determined pursuant to the decision dated 30th January 2023, and following the consultation session that took place on 11th of December 2023 pursuant to the provisions of the Presidential Decree 52/2012 and

- (a) on the basis of the exchange of views with all involved parties, during the whole consultation process with regards to the changes of airport charges, the needs for readjustment of the charges according to the operational conditions of the Airport and the relevant needs for recovery of cost, as such needs have been presented in the aforementioned consultation session;
- (b) taking into account the letter received by IATA/BAR.GR 12.01.2024 raising their objections against the proposed charges, which we considered and found not to be substantiated for the following reasons:
 - a. timeline of material submission: all consultation material has been provided to the Users through the Airport Users Committee, in accordance with the explicit provisions of Article 4 of PD 52/2012 (Government Gazette A 102/27.04.2012) that has incorporated in Greek law the Directive 2009/12/EC of the European Parliament and of the Council, dated March 11,2009 re Airport Charges. The material was submitted to the Airport Users Committee on 20th of November 2023, three weeks prior to the scheduled consultation session, a period considered sufficient for the Users to prepare themselves. In any event the Directive and the PD do not foresee a specific time by which the material must be submitted. The relevant invitation was also uploaded on the Airport Operator's website.
 - b. level of detail of information submitted: all questions raised before and during the consultation session have been addressed through our response on 22nd of December 2023, including details of the cost allocation between aero and non-aero activities. In any event, we consider that the level of detail of the material submitted is sufficient and in accordance with the requirements of PD 52/2012. Article 7.1.c. of EC Directive 2009/12 and article 5.1.c. of the PD 52/2012 impose an obligation on the Airport Operator to share with the Airport Users: "*the overall cost structure with regard to the facilities and services which airport charges relate to*", and by no means an exhaustive breakdown of individual costs. In any case, costs and revenues derived by the non-aeronautical charges and activities are not regulated by the legislative framework at issue. Furthermore, regarding the photovoltaic parks and the Entry Exit System, all available information was presented during the aforementioned consultation session and our response on 22nd of December 2023.
 - c. PRM & Security Charges: this consultation does not involve these charges.

The changes on the Charges of the Airport that shall enter into force from 01.04.2024 are as follows:
